Backflow testing log

Each assembly and the look between tests

01 Building and water supplier

Building	Water supplier and its testing interval	Year	Kept by (printed name)

02 Each assembly

NUMBER	LOCATION	TYPE AND SIZE	SERIAL NUMBER	TESTED ON	RESULT	TESTER AND CERTIFICATE NUMBER	REPORT SENT	NEXT DUE

Type: RP (reduced pressure), DC (double check), PVB (pressure vacuum breaker). An assembly that fails is repaired and tested again: write both lines.

03 The look between tests

6 checks

CHECK	OK	FAIL	NOTE
RP relief valve not running with water	☐	☐	
Each assembly reachable, nothing stored against it	☐	☐	
Shutoff valves on each side open	☐	☐	
No leaks or damage; test cocks capped	☐	☐	
Kept from freezing: enclosure closed, heat on	☐	☐	
Test tag on each assembly, last test date on it	☐	☐
